Dear [REDACTED]

The State of Washington Department of Natural Resources has identified certain state owned tidelands throughout Puget Sound that would be amenable for intertidal geoduck aquaculture, one of which is located nearby your residence (please see map enclosed).

The department has received and accepted an offer to make use of approximately one acre of this tideland parcel for geoduck aquaculture.

The present timeframe for planting the parcel is at least one year out.

If you would like to know more about our program, please feel free to call me at (360) 732-7411.

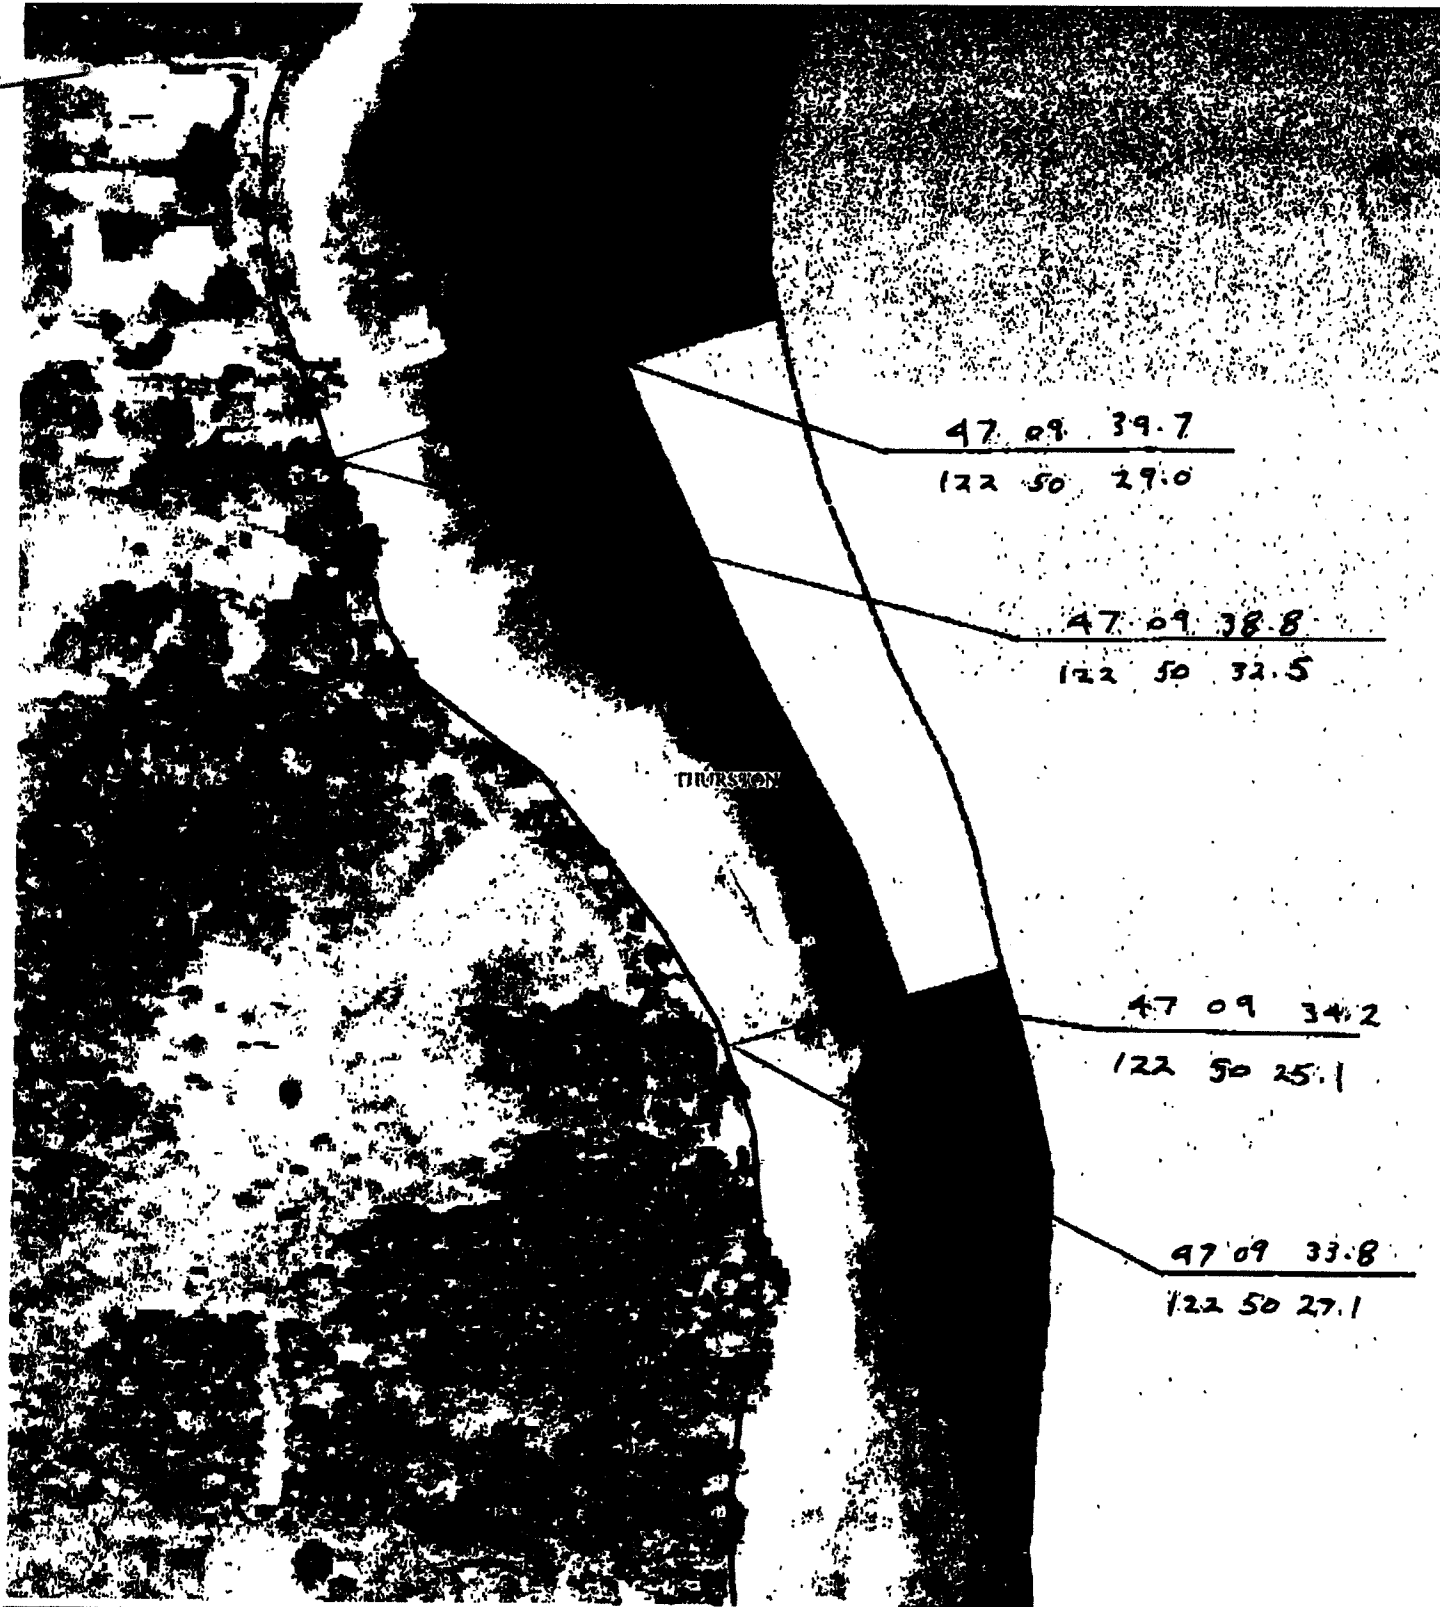

Sincerely,

Jeff Schreck
